E-Governance & computerization policies of various state & central government departments in India focus on Effective Administration, Timely result oriented decision, Cost reductions, leakage elimination, digitization, automations, information at the finger tips to the entire stakeholder & transparency are some of the key parameters adopted. Over the last decade there has been a massive transformation in the way the public services are rendered to the citizens, accountability of government funds & reducing the leakages.

ROI

40% Reduction in the monthly expenditure

100% Elimination of Buddy punching & Fake Attendance entry

Verification & authenticity of physical presence resulted in faster execution of work

About Manvish

Manvish was started in the year 1999 as an IT services, solutions and IT Consulting Company to help enterprises transform into digital workplaces & improve process efficiency. Manvish eTech has over time diversified its operations and grown into one of India's premier organizations, developing sophisticated hi-tech hardware & software products. We provide embedded solutions, enterprise resource planning, engineering solutions, content development, web services, software services & solutions to basic service providers or clients, all with a complex network/cluster of service centers. An excellent process methodology brings home the advantage of delivering solutions on time, every time. Manvish eTech has also developed indigenous customizable hand held computers, which can be used in multitude of applications, and these products are available through direct selling, resellers, channel partners, and authorized representatives.
